A term project shall be done in lieu of a final exam. The project you choose:
- must be of topical interest, and relate to course material of EE5200. 2 persons/team.
- must be new work (not copied from your previous courses or a past student's project).
- must demonstrate a graduate student level of mastery and application of the related concepts and theories. [Note: this is not simply a term paper, but a project.]
- is sufficiently researched, referenced, and documented, and also includes the in-depth analysis and evaluation of the concepts of the most key journal paper related to this work.
- length of body of report: approximately 10 pages of text (not including figures, tables, or equations). All writing is your own original writing. Plagiarism is strictly prohibited!

Time line and required submissions are as follows, add'l deliverables contribute to the grade of your term project, i.e. ~15% of your course grade. Approximate schedule is:
- Week 6 (Friday): submit short e-mail with idea(s) requesting instructor feedback.
- Week 7 (Friday): submit formal outline of project and list of key references.
- Week 9: submit expanded outline of project and complete reference list - *
- Week 11: Submit draft of journal paper analysis (JPA)
- Week 12: Submit working prototype and first rough draft of project report *
- Week 13: Submit final JPA and .ppt presentation *
- Week 14: Submit final report/deliverable *
- Finals week: be prepared to present/demonstrate project during final exam time-slot.

* graded milestone

Report Outline:
Front Matter:
- Title Page
- Executive Summary (not needed for initial draft)
- Table of Contents (use as "working outline")
- Statement of contributions by each team member, signed in agreement by all.

Body of report (max 10 pages of text, plus figs):
- Introduction (brief overview of project: problem area, motivation, overview of project)
- Background
  - literature search, most important references
  - Presentation of key concepts connected with project
  - Identification of existing voids or weaknesses, and resulting opportunity
- Proposed Approach
  - Overview of basic idea that you will develop and implement
  - Development of applied math details
- Implementation (may be only partially complete in draft versions)
- Results (Expected Results in draft versions)
- Conclusions: salient points, cause-and-effect relationships, sensitivities, etc.
- Recommendations for Continued Work

Supplemental Information:
- Reference List (IEEE format, numbered [1], [2], etc, in order of first author's last name)
- Appendices as required to document details

Suggested layout:
- Font: 11-pt CG Times w/1.25-1.5 line spacing; or 10-pt comic or ariel w/1.0-1.25 line space
- Page layout: 1" margins, include page numbering within margin area.
- Use equation editor, number equations, call out references by number [1].
