

## Lab 1 Prelab

Read through the Quartus II Introduction to Verilog Design tutorial and answer the questions below. You are not required to use the lab machines; the purpose of this prelab is to get acquainted with some of the basic features commonly used in Quartus II using Altera's DE-2 Board. However it may be helpful to you to run through the examples provided in the tutorials to make the lab exercises go more smoothly.

1. Where would you go to modify the text editor in Quartus II?
2. Selecting Edit>Insert Template>Verilog HDL helps to alleviate what problem?
3. If you closed the Compilation Report and want to re-view it, where would you go?
